Kangaroo Island

- A Penneshaw
- B American River
- C Kingscote
- D Kingscote Airport
- E Parndana

Level 3

- T Goolwa
- T Victor Harbor

SOUTH AUSTRALIA'S FIRST ELECTRIC VEHICLE ROUTE

It is now possible to travel from Adelaide, through the spectacular Adelaide Hills onto the glorious Fleurieu Peninsula and across to beautiful Kangaroo Island stopping at wineries, restaurants, beaches and other fabulous attractions without going near a service station.

We now have electric car stations scattered throughout the region catering for every type of vehicle. The Level 2 stations will enable most vehicles to top up with power whilst they are shopping, at lunch or picking strawberries, while the Level 3 fast chargers will take care of the supercars.

With the support of the state government and all of the councils in our region we have installed chargers in Mount Barker, Strathalbyn, Goolwa, Victor Harbor and Yankalilla linking to the established network on Kangaroo Island.

We are delighted with the support of Mitsubishi and Tesla who are here today enabling you to see and drive in their electric vehicles. Mark Harrington is here to introduce his new luxury electric vehicle chauffeured hire car company and the South Australian Electric Vehicle Club is well represented.

Electric vehicles has travelled the path of all new technologies as Gartner said matches expectations against maturity moving past the peak of inflated expectations through the trough of disillusionment towards the slope of enlightenment.

We are delighted to be at the forefront where we can link the introduction of new environmentally sound technologies whilst showcasing the best our region has to offer.
