*Hint...* Some of these videos are very long and to make it easier to view and to be able to skip (boring) sections, use a YouTube Downloader. This will download the video to your computer for viewing later.

I use **YTD (YouTube Downloader)** from: <https://www.ytddownloader.com/>

This is a free download, but if you pay the small fee (each year) you can access more features.

The resolution of the downloaded video can be selected as required.

This program is very easy to use and can be used for several sites other than YouTube.

Plus other Channels that you come across...
